

WATERMELON ARAMIS

A LARGE TRIPLOID, HYBRID WATERMELON WITH EXCELLENT TASTE

- Ideal for early and summer season
- Large, uniform, seedless fruit
- Deep red, firm flesh with long shelf life
- High brix and excellent taste
- Very high yielding with strong vines

Type:

A hybrid triploid watermelon.

Maturity:

Main season 85 - 95 days.

Plant Characteristics:

Very vigorous plants with healthy leaf cover that protects the fruit against sunburn.

Fruit Characteristics:

Large, uniform elongated fruit with weight of 9 - 13kg. The rind has a medium green colour with light green stripes. The flesh has a deep red colour and crisp texture, with very good flavour and high brix.

Disease Resistance:

IR: Fusarium wilt (Fon: 0,1)

Plant Spacing:

2,500 to 3,000 plants per ha, grafted on a suitable rootstock. Inter-planted with a suitable pollinator variety (833 to 1,500 plants/ha). Total plant population 3,333 to 4,500 plants/ha.

Adaption:

ARAMIS is recommended for early and main season production.

Pollinator:

A suitable pollinator must be inter-planted at a recommended ratio of 3:1 in the main season, when the conditions are favourable. In the early season and periods of difficult pollination, it is advisable to plant at a ratio of 2:1. Consult our seedless production guidelines for further information.

Features & Benefits:

ARAMIS is very high yielding with large, uniform fruit size. The flesh has a deep red colour, firm texture, excellent flavour and high brix. Suitable for fresh-cut, fresh market and supermarkets.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
