

# WATERMELON BOXY

## A MEDIUM SIZE, CRIMSON SWEET TYPE, HYBRID WATERMELON

- Ideal for early and main season
- Oval-round, very uniform fruit
- Intense red flesh colour
- Very firm texture, exceptional flavour and brix
- Resistance to Fusarium

### Type

A hybrid Crimson Sweet type watermelon.

### Maturity

Main season 75 - 80 days.

### Plant Characteristics

A vigorous plant with high, uniform yield.

**Plant Population:** 4,000 to 8,000 plants per ha.

**Adaption:** BOXY is recommended for main season production.

### Variety Characteristics

**Fruit Characteristics:** Medium size, uniform oval-round fruit with weight of 4 - 8kg. The rind has a medium green colour with light green stripes. The flesh has intense red colour and crisp texture, with excellent flavour and brix.

**Pollination:** Approximately 7 male flowers develop for every female flower. When flowers appear, 2 to 4 bee hives should be placed per ha.

### Features & Benefits

BOXY is very high yielding and produces exceptional quality fruit with mini seeds.

**Disease Resistance:** IR: Fon (0,1)

**Disclaimer:** This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

**Resistance:** is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
