

CARROT BRILLYANCE

A VERSATILE HYBRID VARIETY WITH EXCELLENT LENGTH POTENTIAL

- Excellent attachment strength
- Very good seedling vigour
- Very high yielding
- Outstanding external texture and length
- Medium to late maturing

Type

F1 Nantes hybrid.

Maturity

110 - 120 days (summer), 130 - 140 days (winter).

Plant Characteristics

Leaf Characteristics: Dark green colour, long length, upright growth habit with a very strong attachment.

Root Characteristics: 20 - 23 cm root length, cylindrical with well rounded tip shape, bright orange colour, very smooth texture and excellent uniformity.

Variety Characteristics

Bolting: Excellent bolting resistance.

Growing Guidelines: Sowing: Ensure good seedbed preparation prior to sowing. Pre-pack carrots: 1.0 – 1.8 million seeds per hectare.

Features & Benefits

Very high yielding with long roots and excellent resistance to summer bolting.

Market Segment: Fresh market, pre-pack and bunching markets.

In-situ Storability: Very good storability.

Disease Resistance: HR: *Alternaria dauci*, Powdery Mildew, *Cercospora carotae* and Cavity Spot.

IR: *Rhexocercosporidium carotae* (Acrothecium)

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
