

GREEN MULTILEAF BUTTERHEAD LETTUCE CANAGIO

GREEN MULTILEAF BUTTERHEAD LETTUCE FOR YEAR ROUND PRODUCTION

- Easy leaf separation “one cut variety”
- Medium dark green uniform leaves
- Non folding leaf habit
- Suited for hydroponic production
- Slow bolting

Type
Multileaf butterhead lettuce variety that is suited for soil and hydroponic production for the fresh and processing market
Maturity
30 - 40 days from transplant
Plant Characteristics
Slow bolting, open habit with round base with excellent mildew resistance.
Variety Characteristics
Uniform compact leaves that separate easily and is non folding. Thick leaf diameter with excellent texture and taste. High marketable yields and small cut surface.
Features & Benefits
HR: Bremia (Bl): 16 – 37 EU; Nasonovia Ribisnigri (Nr): 0

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
