

SCALLOP CARTWHEEL

A HYBRID YELLOW SCALLOP WITH VIRUS RESISTANCE

- Even scallops around fruit margin
- Bright yellow colour
- Small blossom - end scar
- Excellent yield potential
- Intermediate resistance to Zucchini Yellow Mosaic Virus

Type:

Yellow scallop hybrid.

Maturity:

Medium.

Plant Characteristics:

A dense growing habit with some side-branching. A medium-sized frame with medium petiole length.

Fruit Characteristics:

Very uniform shape. Well defined scallop around fruit margin which is maintained throughout the harvest period. A small blossom end scar with a medium to small green stem attachment. A very high yield potential.

Yield Potential:

Above average.

Disease Resistance:

Intermediate resistance to ZYMV.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
