# MELON CYCLONE

# AN EXTENDED SHELF LIFE CANTALOUPE, WITH LARGE SIZE AND EXCELLENT TASTE

- · High brix and excellent taste
- · Ideal for mid-summer season
- Strong disease resistance package
- Deep orange, firm flesh with long shelf life
- Large round/oval, well-netted fruit with no ribbing

#### Type:

A hybrid cantaloupe melon. Eastern Shipper external appearance and Western Shipper internal qualities, referred to as extended shelf life.

#### Maturity:

Main season 80 - 85 days.

#### **Plant Characteristics:**

A medium vigorous plant with a healthy leaf cover that protects the fruit against sunburn. Flowers and sets fruit evenly to give high yield.

#### Fruit Characteristics:

Harvest indicators include net development, the change of the rind colour from lime green to light yellow, and cracking around the peduncle. Large sized fruit with weight of 1.8 – 2.6 kg. The shape is round to oval with a medium, well-developed net. CYCLONE has deep orange flesh colour, firm flesh texture, high brix and excellent taste. The fruit has a long shelf life and medium seed cavity.

#### Disease Resistance:

HR: Fusarium (Fom) 0, 1, 2.

IR: Powdery Mildew (Px) 1, 2; Vine Decline (Mc).

### Adaption:

CYCLONE is recommended for main summer season production.

## Yield Potential:

Very high yield potential.

#### Features & Benefits:

CYCLONE is very high yielding, with a deep orange flesh colour, firm texture, high brix and excellent taste. The fruit has a long shelf life, and is suited to the fresh-cut and whole fruit markets.

**Disclaimer:** This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
