

SCALLOP GALAXY

HIGH QUALITY GREEN SCALLOP WITH POWDERY MILDEW RESISTANCE

- Well defined dark green scallops
- Large upright plant habit
- Well-adapted to a variety of growing conditions
- Intermediate resistance to Zucchini Yellow Mosaic Virus and Powdery Mildew

Type:

Green scallop / patty pan hybrid.

Maturity:

Early medium.

Plant Characteristics:

Galaxy has a large frame with an upright plant habit with high yield potential.

Fruit Characteristics:

The fruits are dark green in colour. The well-defined scallops can be found in the middle of the fruit. The fruits have a small blossom end scar and a neat stem attachment. High fruit uniformity can be expected.

Yield Potential:

High, increased ZYMV and PM resistance can extend harvesting period.

Disease Resistance:

Intermediate resistance to ZYMV and PM.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
