

# LETTUCE GREEN MACHINE

## A QUICK MATURING TANGO TYPE BABY LEAF LETTUCE FOR YEAR ROUND PRODUCTION

- For all seasons
- Approximately 20-25 days in summer and 30-50 days in winter. Harvesting earlier as a baby leaf
- Highly adaptable
- Deep green colour
- Uniform

### Type

Green Machine is a Tango Type lettuce for year round production.

### Maturity

Approximately 20-25 days in summer and 30-50 in winter.

### Plant Characteristics

Deep green colour. Quick maturing baby leaf. Can be harvested when leaves are approximately 8-10cm tall. **Good holdability in winter however Green Machine MUST be harvested at baby leaf stage in summer or it risks bolting.**

### Features & Benefits

Good vigour and taste. Upright growing habit. Narrow sweet tasting leaves. Ideal for salad mixes.

**Disclaimer:** This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

**Resistance:** is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
