

ZUCCHINI GREEN TIGER

AN UNIQUE, STRIPED ZUCCHINI HYBRID

- Distinctive fruit appearance
- Open plants with short internodes
- Very prolific with a long harvest season
- Intermediate resistance to ZYMV, WMV, and PM
- Well adapted to a variety of growing conditions

Type:

An unique, striped hybrid zucchini squash.

Maturity:

Medium early.

Plant Characteristics:

Open plants with short internodes and an upright habit. Adapted to both open field and protected production.

Fruit Characteristics:

Light and dark stripes make Green Tiger very distinctive. Fruit shows a slight club-shape and is quite glossy.

Disease Resistance:

Intermediate resistance to ZYMV, WMV and PM.

Yield Potential:

Very high as plants stay healthy longer than many other varieties. This gives an extended bearing period. The strong virus resistance package make Green Tiger well-suited to organic production. The fruit is very attractive and distinctive which makes brand - marketing a possibility.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
