

SWISS CHARD GREEN WAVE

AN EXCITING SWISS CHARD WITH A GREEN MIDRIB

- Productive Plant - High Yield Potential
- Green Midrib
- For all seasons
- Ideal for Processing

Type:

A Swiss Chard with a green stem.

Maturity:

40 - 60 days after sowing depending on weather conditions.

Plant Characteristics:

Very productive plants.
Large medium-green leaves.
Slender and tender light-green midrib.

Features & Benefits:

Productive plants producing large and healthy leaves ideal for the bunching market. Large leaves with a slender and light-green midrib makes GREEN WAVE ideal for processing.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
