

MELON HERALD

A HYBRID HONEYDEW MELON WITH EXTRA-LARGE FRUIT AND VERY GOOD TASTE

- Fusarium resistance
- High brix and good taste
- Light green and aromatic flesh
- Attractive, slightly oval fruit, with smooth off-white skin
- Large to extra-large fruit for late, winter and early season production

Type:

A hybrid honeydew melon.

Maturity:

Main season 80 - 85 days.

Plant Characteristics:

A vigorous plant with a healthy leaf cover that protects the fruit against sunburn.

Fruit Characteristics:

Harvest indicators include a change in rind colour from light green to off-white. Large sized fruit with weight of 2,5 - 3,8 kg. The fruit shape is oval to rounded oval. HERALD has a light green to mid-green flesh colour, with good flavour and brix development.

Disease Resistance:

HR: Fusarium wilt (Fom: 2).

Adaption:

HERALD is recommended for late, winter and early season production in the mild Northern growing areas.

Yield Potential:

High yield potential.

Features & Benefits:

HERALD has attractive large to extre-large, off-white fruit with light green to mid-green flesh. The fruit has good flavour and brix development and is suitable for the fresh market.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
