

PUMPKIN INVINCIBLE

A WHITE HYBRID PUMPKIN

- Firm orange flesh with a thin rind
- Extremely thick flesh with a small seed cavity
- Early maturing
- Semi-bush growth habit
- Thin smooth skin

Type:

A white hybrid pumpkin with a semi-bush growth habit.

Maturity:

90 days in summer, 100 - 110 days in cool winters. INVINCIBLE should only be harvested once the fruit stems develop cork-like cracks and lose most of their green colour. Storage for 2 weeks after harvest will result in under-skin greening being much reduced.

Plant Characteristics:

Semi-bush growth habit. Can be planted up to 7000 plants per hectare. Quick maturing. Deep orange, thick and very firm flesh, with excellent keeping quality.

Fruit Characteristics:

Medium-sized white fruit with slight ribbing. Fruit has a deep shape with an average weight of 4.5kg. Small seed cavity, thick shoulder and

Yield Potential:

High.

Disease Resistance:

Good general disease resistance. Early maturity may avoid some disease problems.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
