

# ONION IRATI

## AN EARLY SHORT DAY HYBRID ONION

- Excellent golden brown colour
- Widely adaptable and bolt-tolerant
- Good storage capability
- Tight necks and outstanding scale retention

### Market Aim:

A yellow fresh market onion.

### Storability:

Medium (3-4 months).

### Taste:

Moderately pungent.

### Bulb shape:

Grano round.

### Bulb size:

Medium (65 – 90 mm).

### Skin Quality:

Outstanding skin color and scale retention for this maturity class.

### Variety Description:

Short day variety with excellent colour and firmness, IRATI has uniform bulbs and capable of producing high yields. Retains good bulb quality during mechanical harvest.

**Disclaimer:** This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

**Resistance:** is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
