

ONION LUCINDA

A LATE SHORT DAY HYBRID

- Firm bulbs with improved skin colour
- Consistently high yields
- Good uniformity of bulb shape
- Good bolting tolerance
- Thin necks and small base plate give top quality bulbs
- Firm bulbs give some storage capacity

Market Aim:

Fresh market with some storage.

Storability:

Moderate (3-4 months).

Taste:

Pungent.

Bulb shape:

Round.

Bulb size:

Medium to large (65 – 100mm).

Skin Quality:

Fair to good, with dark brown/golden colour.

Plant Characteristics:

Large, upright frames. Grey/green leaves. Good general leaf disease resistance.

Harvesting Period:

23 - 27 weeks after sowing.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
