

LETTUCE MESTIZA

A LARGE FRAMED WINTER LETTUCE WITH BREMIA RESISTANCE AND STRONG BIG VEIN TOLERANCE

- Smooth round shape
- Medium to dark green colour
- Resistance to Bremia (BI 1-31)
- Large frame ensuring excellent frost protection
- Works well as a early, mid and late winter / early spring variety

Type:

MESTIZA is a winter crisphead type lettuce for fresh, processing and pre-packed markets.

Maturity:

60 - 80 days (Winter)

Plant Characteristics:

A large framed lettuce with a medium to dark green colour. A plant population of between 40,000 - 60,000 plants per hectare is recommended.

Features & Benefits:

This cultivar shows good adaptability for early, mid and late winter / early spring plantings and is very cold tolerant. Also has resistance to Bremia: 1 - 31.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
