

# ZUCCHINI MIRA

## A MEDIUM DARK GREEN ZUCCHINI HYBRID

- Small blossom-end scar
- Short to medium length
- Open upright growth habit
- Intermediate resistance to ZYMV
- Virtually spineless petioles and fruit
- Cylindrical fruit with good uniformity

### Type:

A medium dark green hybrid zucchini squash.

### Maturity:

Medium early.

### Plant Characteristics:

Medium size frame, upright habit. Very few spines. This makes Mira easy to harvest with little damage to fruit.

### Fruit Characteristics:

Medium dark green, some small speckles. Glossy appearance. Small blossom end scar. Well rounded blossom end with no taper. Cylindrical form with high uniformity. Short to medium length fruit may show slight ribbing.

### Disease Resistance:

Intermediate resistance to ZYMV.

### Yield Potential:

Yield is above average and intermediate resistance to ZYMV leads to an extended harvest period.

**Disclaimer:** This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

**Resistance:** is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
