

LETTUCE PETRIAN

A LARGE MEDIUM GREEN BUTTERHEAD LETTUCE FOR ALL SEASON PRODUCTION

- Butterhead lettuce with thick medium green coloured leaves
- For all seasons (Maturity 30-50 days)
- Highly adaptable and uniform with good vigour
- Suitable for open field and hydroponics

Type:

PETRIAN is a large butterhead lettuce ideal for the Pre-pack and processing market

Maturity:

30 - 55 days from transplant to harvest.

Plant Characteristics:

Large size with a closed head. Medium green colour with excellent uniformity in open fields and hydroponics.

Features & Benefits:

Good bolting tolerance, large size, excellent uniformity.
High Resistance: BI 29-41 EU/Nr:0
Intermediate Resistance: LMV1

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
