

SCALLOP PINWHEEL

A HYBRID YELLOW SCALLOP WITH VIRUS RESISTANCE

- Precocious yellow fruit - absence of green colouration around blossom end scar
- Even scallop around fruit margin
- Intermediate resistance to Zucchini Yellow Mosaic Virus
- Above average yield potential

Type:

Yellow scallop / patty pan hybrid.

Maturity:

Early medium.

Plant Characteristics:

Pinwheel has a large frame with a dense plant habit. The leave petioles are large in size and thick in diameter.

Fruit Characteristics:

The fruits are precocious yellow in colour and white around the blossom end scar. The scallop can be found in the middle of the fruit. The fruits have a small blossom end scar and a neat stem attachment. The uniformity is very good. Pinwheel is very productive.

Yield Potential:

High. ZYMV resistance may give extended harvest period.

Disease Resistance:

Intermediate resistance to ZYMV.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
