

WATERMELON PREMIUM

A "PERSONAL" SIZE JUBILEE TYPE, HYBRID WATERMELON

- Ideal for early and main season
- Uniform, oval fruit with micro-seeds
- Deep red, firm flesh colour with excellent flavour and high brix
- Excellent pollinator for seedless watermelon
- Resistance to Fusarium

Type

A hybrid Jubilee type watermelon.

Maturity

Main season 75 – 80 days.

Plant Characteristics

A vigorous plant with high, uniform yield. Also used as an excellent pollinator for seedless watermelon.

Plant Population: 4,000 to 8,000 plants per ha.

Adaption: PREMIUM is recommended for early and main season production.

Variety Characteristics

Fruit Characteristics: Small size, uniform oval fruit with weight of 2.5 - 4kg. Good transportability. The rind has a medium green colour with dark green stripes. The flesh has deep red colour, with excellent flavour and high brix.

Pollination: Approximately 7 male flowers develop for every female flower. When flowers appear, 2 to 4 bee hives should be placed per ha.

Features & Benefits

PREMIUM is a "personal size", very high yielding variety with exceptional eating quality and micro seeds. It is also an excellent pollinator for triploid watermelon varieties.

Disease Resistance: IR: Fon (0,1)

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
