

RED MULTILEAF PRODIGIO

DARK RED MULTILEAF LETTUCE FOR ALL YEAR PRODUCTION

- Dark red colour with no spiky leaves
- High yield potential
- Narrow main vein
- Uniform size and shape
- Slow bolting
- Suited for hydroponics

Type

Dark red single cut multileaf lettuce suited for the fresh and processing markets

Maturity

30 - 40 days from transplant

Plant Characteristics

Large uniform plants with a small base and excellent bolting tolerance. Suited for indoor and outdoor production in soil or hydroponics. Variety has a full breimia package (Bl: 16 – 37 EU)

Variety Characteristics

Uniform incised leaves without sharp edges. Good contrast between red and green colours. Prodigio is a single cut variety with leaves that separate easily.

Features & Benefits

HR: Bremia (Bl): 16 – 37 EU; Nasonovia Ribisnigri (Nr): 0;

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
