

CARROT ROMANCE

A ROBUST HIGH YIELDING, HIGH QUALITY PRE-PACK HYBRID VARIETY

- Very cylindrical and well-rounded roots
- Extremely uniform
- Good leaf disease resistance
- Strong, with minimal breakage
- Minimal waste

Type
F1 Nantes hybrid.
Maturity
100 - 110 days (summer), 110 - 130 days (winter).
Plant Characteristics
Leaf Characteristics: Blue-green colour, medium length, very upright growth habit with a very strong attachment. Root Characteristics: 16 - 18 cm long, very uniform, cylindrical well-rounded roots. Bright orange colour and exceptionally smooth texture.
Variety Characteristics
Bolting: Unparalleled bolting resistance. Growing Guidelines: Sowing: Ensure good seedbed preparation prior to sowing. Pre-pack carrots: 1.0 – 1.8 million seeds per hectare.
Features & Benefits
High marketable pack-out percentage with minimal loss from breakage. Market Segment: Fresh market, pre-pack and bunching markets. In-situ Storability: Good. Disease Resistance: IR: <i>Alternaria dauci</i> and Powdery Mildew.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
