

ONION RUBICON

EARLY INTERMEDIATE SEGMENT RED F1 HYBRID VARIETY, WITH GOOD PR RESISTANCE AND EXCELLENT QUALITY

- Early Intermediate segment F1 Hybrid RED variety
- Good PR resistance
- Excellent skin retention

Type

Early Intermediate market segment.

Plant Characteristics

Storability: 2 - 4 Months

Taste: Pungent

Bulb shape: Round - Deep Round

Bulb size: Medium to large (60 – 90mm)

Skin quality: Good skin retention, multiple thin skins.

Variety Characteristics

An intermediate day-length RED F1 Hybrid onion variety, with good PR resistance and excellent foliar disease resistance. Round to deep round shaped bulbs.

Features & Benefits:

An intermediate day-length RED F1 Hybrid onion variety, with good PR resistance and excellent foliar disease resistance.

Diseases: Good general foliage disease resistance, PR Resistance.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
