

BEAN STAR 2054

AN EXTRA FINE GREEN BEAN WITH SUPERIOR POD QUALITY

- Resilient, vertically upright plants with excellent canopy cover
- Exceptional yield potential in the extra fine bean category
- High quality, straight, dark green pods in the extra fine bean category
- Resistance to Rust, Halo blight and BCMV
- Very slow seed development and excellent gel retention

Type:

Bush Bean.

Category:

Extra fine.

Market:

Fresh Market/ Export.

Maturity:

55 -60 days to first harvest, depending on weather conditions.

Plant Characteristics:

Vigorous. Dark green, high quality pods. Very uniform pods.

Plant Frame:

Medium to Large.

Plant Habit:

Upright.

Pods:

Pod set: Moderate to concentrated.

Pod length: 12 - 14 cm.

Pod Diameter:

6.1 – 7.0mm: 75%

7.1 – 8.0mm: 25%

Disease Resistance:

High Resistance: Bean Common Mosaic Virus (BCMV), Rust (Ua) and Halo blight (Psp).

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
