

CARROT STAR 3006

A MULTIPURPOSE NANTES HYBRID VARIETY WITH HIGHEST LEVEL OF ALTERNARIA TOLERANCE

- Excellent Alternaria resistance
- Good seedling vigour
- Strong foliage
- Adaptable for pre-pack, freezing, juice and bunching market

Type:

F1 Nantes hybrid.

Maturity:

95 - 105 days (summer), 105 - 135 days (winter).

Market Segment:

Fresh market, pre-pack, processing, bunching and juicing markets.

Leaf Characteristics:

Dark green colour, medium to long length, upright growth habit and a strong attachment.

Root Characteristics:

14 – 18 cms root length, cono-cylindrical root shape, intense orange colour and moderately smooth texture.

Bolting:

Minimal bolting under extremely hot conditions.

In-situ Storability:

Good, especially late season.

Disease Resistance:

HR: Alternaria (Ad) and Cavity Spot (Ps).

ID: Oidium.

Growing Guidelines:

Sowing: Ensure good seedbed preparation prior to sowing. Pre-pack carrots: 1.0 – 1.8 million seeds per hectare.

Features & Benefits:

Due to its vigour, STAR 3006 requires approximately 30% less Nitrogen than standard nantes varieties Seed formats available:

- Standard seed & Super seed
- World leader in Alternaria Resistance

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
