

CABBAGE STAR 3317

A VIGOROUS QUICK MATURING FRESH MARKET CABBAGE HYBRID

- Early to medium maturing cultivar
- Medium to large upright frame with
- Exceptional holdability
- Produces firm semi-globe shaped heads
- Good uniformity, allows for a uniform cut in the field

Type

A medium to large hybrid cabbage variety for the fresh market.

Maturity

Early to medium maturing. Approximately 80 - 90 days from transplant to maturity in summer. Maturity is very uniform with a high first cut percentage.

Plant Characteristics

A medium to large frame that has an upright leaf habit. A plant population of 28,000 plants per ha is recommended for single head marketing, and 30,000 - 35,000 plant per ha for bags. Plant population will influence head size. For larger head size plant population should be reduced to suit your needs.

Head Characteristics: STAR 3317 has semi globe shaped heads weighing between 2 - 3.5kg with very good internal quality.

Variety Characteristics

Fertilization Guidelines: This is a general guide, grower conditions vary and a soil analysis is highly recommended.

N: 150 to 200kg/ha. 70 to 90 kg/ha incorporated preplant.

Top dress the balance as follows:

Summer: 7,14 and 28 days after transplanting (no later).

Winter: 14,28 and 45 days from transplant (no later).

P: 50 kg/ha incorporated preplant. K: 120 kg/ha incorporate preplant. Soil pH: 6 - 6,8.

Features & Benefits

STAR 3317 offers the grower the opportunity to achieve high marketability under Black Rot pressure. STAR 3317 has good holdability and uniformity which allows for very uniform cut.

Disease Resistance: Good black rot resistance under field observation.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
