# PUMPKIN STAR 7001

### A WHITE HYBRID PUMPKIN

- Semi-bush growth habit
- High yielding
- Uniform, large fruit (8 kg)
- Good heat and cold tolerance
- Early Maturing

#### Type:

A white hybrid pumpkin with a semi-bush growth habit.

#### Maturity:

Approximately 80 - 90 days to maturity in summer and 100 - 110 days in cool winters.

#### Plant Characteristics:

A vigorous and productive plant with a semi-bush habit. STAR 7001 should be planted at 7,000 plants/ha in summer and 6,000 plants/ha in winter production areas.

#### Fruit Characteristics:

An attractive white fruit with a very good transport and storage ability. A deeper shape than FWB van Niekerk (150 x 300 mm) with a shallower stem attachment. An average weight of 8 kg. Thinner skin and narrower green border between the skin and flesh than FWB. Firmer, thicker and better coloured flesh. Fruit have shallower sutures and a smaller blossom end scar than FWB, This gives better storage capability. The seed count is approximately 4 - 5 seeds/gram.

#### Yield Potential:

Very high.

#### Disease Resistance:

The early and concentrated yield of STAR 7001 normally helps to limit yield loss from powdery mildew and virus infections.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
