

PUMPKIN STAR 7022

A GREY HYBRID PUMPKIN

- High yield potential
- Early maturing
- Semi-bush growth habit
- Smooth 'easy to peel' skin

Type:

A grey hybrid pumpkin with a semi-bush growth habit.

Maturity:

Early maturing. Approximately 90 days to maturity in summer and 110 days in cool winters.

Plant Characteristics:

A vigorous and productive plant with a semi-bush habit. STAR 7022 should be planted at 7,000 plants/ha in early summer and 6,500 plants/ha in winter. Semi-bush characteristics are most obvious in early growth stages.

Fruit Characteristics:

An attractive grey fruit with good transport ability. A deep blocky shape, 250mm in diameter and 200mm deep, An average weight of 5 kg. Fruit are very smooth and this aids peeling at home or in the factory. The deep fruit form makes this variety well suited to filling bags for the market.

Yield Potential:

High.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
