

PUMPKIN STAR 7028

A GREY HYBRID PUMPKIN

- Excellent yield potential
- Early maturing variety with a vine-type growth habit
- A deep-flat fruit with slight ribbing
- Intermediate resistance to ZYMV
- Good general leaf disease resistance

Type:

A grey hybrid pumpkin with a vining growth habit.

Maturity:

Early maturity, 85 days in summer, 95 - 100 days in cool winters.

Plant Characteristics:

An extremely early maturing plant with a vining growth habit. Can be planted at 7,000 plants/ha.

Fruit Characteristics:

Average fruit size of 5kg, deep shape with slight ribbing. Skin is thin with only a small green layer between skin and flesh. Medium size seed cavity and small blossom end scar. Flesh is deep orange, thick and very firm, with excellent keeping quality. Fruit should only be harvested once the stems develop cork-like cracks and lose their green colour. Can be stored.

Yield Potential:

Very high.

Disease Resistance:

Intermediate resistance to ZYMV.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
