

ZUCCHINI STAR 8024

A DARK GREEN ZUCCHINI HYBRID

- High yield potential
- Intermediate resistance to ZYMV
- Medium - dark green, glossy and very cylindrical fruit
- Mid - early maturing, open growing habit, with a medium size plant frame

Type:

Medium to dark green processing variety.

Maturity:

Medium early.

Plant Characteristics:

Open growing habit, with a medium size plant frame and short – medium petioles.

Fruit Characteristics:

Medium to dark green glossy fruit. Very long fruit and very cylindrical after pollination. Fruit is very straight for its length. Very high uniformity. Moderate number of speckles with a medium size result in attractive appearance. Very small blossom end scar with almost no tapering. Spineless.

Disease Resistance:

Intermediate resistance to ZYMV.

Yield Potential:

Very high. Fruit can be harvested at a greater mass than shorter varieties. Which makes it suitable as a processing variety.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
