

TOMATO STAR 9011

A DETERMINATE TOMATO HYBRID WITH A COMBINATION OF DISEASE RESISTANCE AND OUTSTANDING FRUIT QUALITY

- High fruit quality
- Small attachment, highly refined fruit
- Excellent flavour and taste
- Excellent disease resistant package

Type:

A determinate, long shelf life tomato hybrid suited to open-field production for the fresh market as a trellised type.

Maturity:

Early to medium maturing variety. In summer plantings the first fruit will mature in 80 - 85 days after transplanting. The date of harvesting may vary by as much as 10 days between early and late season plantings. This needs to be taken into consideration when planning planting schedules under different growing conditions.

Plant Characteristics:

A vigorous, dark green, highly disease resistant plant with a determinate growth habit. Plant height can vary between 1,4 - 1,7 m. At least 3 - 4 wires are necessary to trellis the plant effectively.

Fruit Characteristics:

STAR 9011 has very high quality, deep oblate fruit with an average weight of between 140 - 160 g. STAR 9011 fruit has the unique combination of long shelf life and a traditional flavour. Fruit colour is red to deep red; no green shoulders are present.

Plant Population:

A plant population of 15,000 - 18,000 should be used. In-row spacing should not be less than 35cm between plants.

Disease Resistance:

HR: Verticillium Wilt (Va,Vd), Fusarium Wilt (Fol 1,2), Bacterial Wilt (Rs), Tobacco Mosaic Virus (TMV).
IR: Root-knot Nematodes (Ma,Mi,Mj), Powdery Mildew (It), Tomato Spotted Wilt Virus (TSWV).

Features & Benefits:

STAR 9011 provides the grower with a unique combination of excellent disease resistance and high quality fruit. A very high marketable yield potential due to STAR 9011's excellent disease resistance package and high quality fruit.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
