

# BEAN SAWA

## EXTRA FINE GREEN BEAN WITH HIGH YIELDING AND DISEASE RESISTANCE CAPABILITIES

- Fresh Market and retail
- Excellent disease package
- Extra fine green bean
- Medium maturing

### Type

Extra fine, dark green pods.

### Maturity

Medium maturing 55 to 60 days to first harvest, depending on weather conditions.

### Plant Characteristics

Medium compact bush type. With an average plant height of 35cm – 50cm.

### Variety Characteristics

Excellent high quality extra fine uniform bean for local and retail markets. Excellent quality high yielding dark green bean. Eighty percent (80%) of the total yield has a diameter of 5mm – 6mm. Twenty percent (20%) of the total yield has diameter of 6mm to 6.5 mm. With a Pod length of 13cm to 14cm.

### Disease Resistance

HR: Halo Blight (Psp), Rust (Ua), Anthracnose (Cl), Bean Common Mosaic Virus (BCMV).

### Features & Benefits

The extra fine bean has got an exceptionally good disease resistance package. Extended picking habit.

**Disclaimer:** This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

**Resistance:** is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
