

CUCUMBER SIRIANA

SIRIANA IS A WELL-BALANCED PLANT PRODUCING HIGHLY UNIFORM FRUIT WITH THE ADDED BENEFIT OF NEW DELHI VIRUS RESISTANCE AND CGMMV.

- Excellent disease package
- High yield potential
- Fruit is uniform and dark green
- Fruit size of 32cm to 36cm

Type:

Dark green English cucumber with a balanced plant and generous disease package suitable for active and passive greenhouses.

Maturity:

Early to medium maturity depending on summer and winter conditions.

Plant Characteristics:

Siriana is a medium maturing vigorous grower with a very good disease package featuring *Tomato Leaf Curl New Delhi Virus* (ToLCNDV) resistance.

Fruit Characteristics:

Highly uniform cylindrical fruit ranging from 32cm to 36cm, with a dark green skin and high yield potential.

Features & Benefits:

Performs very well in coastal areas with uniform continues set.

HR: Ccu

IR: Cca / CVYV / CYSDV / Px / CGMMV / ToLCNDV

CMV = Cucumber Mosaic Virus;

CYSDV = Cucurbit Yellow Stunting Disorder Virus;

Cca = Corynespora blight and target spot;

Ccu = Scab and gummosis Caused by *Cladosporium cucumerinum*;

Px = Powdery mildew;

CVYV = Cucumber Vein Yellowing Virus

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
