

# LETTUCE SKINDEL

## A VERSATILE SUMMER CRISPEAD LETTUCE WITH SUPERIOR DOWNY MILDEW RESISTANCE

- Medium-large plant frame size
- 45 - 55 days from transplant to maturity
- Ideal for summer to early autumn harvest
- Superior Downy Mildew (*Bremia lactucae*) resistance (BL: 16 - 32)

### Type:

SKINDEL is a crisphead type summer lettuce ideal for fresh, pre-packed and processor markets.

### Maturity:

45 - 55 days from transplant to harvest.

### Plant Characteristics:

SKINDEL has a medium to large frame with a deep green colour. A plant population of between 60,000 to 80,000 plants/ha is recommended.

### Disease Resistance:

SKINDEL has superior downy mildew (*Bremia lactucae*) resistance (BL: 16 - 32) as well as resistance to aphid (*Nasonovia ribisnigri* Nr:0).

### Features & Benefits:

SKINDEL is quick to mature that gets product earlier on the market with less spraying, irrigation and input costs. It has a good heat tolerance and can handle hot conditions with low risk for detrimental effects. It has a compact, flat round head with good ribbing which makes it attractive and suited for the pre-packed market.

**Disclaimer:** This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

**Resistance:** is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
