

LETTUCE SMILE

A NASONOVIA RIBISNIGRI RESISTANT OAK LEAF LETTUCE

- Good vigour
- Strong tolerance against tip burn
- Very upright growth reducing bottom rot

Type:

Green oak leaf type

Maturity:

30 - 60 days from transplant to harvest.

Plant Characteristics:

Good vigour and very upright growth reducing bottom rot

Features & Benefits:

Resistance to Bremia (BL1-17,19,21), Lettuce Mosaic Virus and Nasonovia Ribisnigri.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
