

# WATERMELON TURBO 840

## A LARGE, ALL SWEET TYPE, HYBRID WATERMELON WITH EXCELLENT FRUIT QUALITY

- Large uniform fruit
- Deep red flesh colour with crisp texture and high brix
- Very high yield potential
- Resistant to Fusarium & Anthracnose

### Type:

A hybrid All Sweet type watermelon.

### Maturity:

Main season 85 - 90 days

### Plant Characteristics:

Vigorous plant with healthy leaf cover that protect the fruit well.

### Fruit Characteristics:

Large, uniform elongated fruit with weight of 10 - 13kg. The rind has a medium green colour with light green stripes. The flesh has a deep red colour and crisp texture, with very good flavour and high brix.

### Disease Resistance:

IR: Fusarium (Fon) 1 and Anthracnose (Co) 1.

### Plant Spacing:

4,000 to 8,000 plants per ha

### Adaption:

TURBO 840 is recommended for main season production.

### Pollinator:

Approximately 7 male flowers develop for every female flower. When flowers appear, 2 to 4 bee hives should be placed per ha.

### Features & Benefits:

TURBO 840 is high yielding, with large elongated fruit of uniform shape and size. The flesh has a deep red colour, crisp texture, very good flavour and high brix.

**Disclaimer:** This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

**Resistance:** is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
