

# LITTLE GEM LETTUCE TYROS

**HIGH VIGOR LITTLE GEM LETTUCE WITH  
EXCEPTIONAL QUALITY AND WEIGHT FOR  
YEAR ROUND PRODUCTION**

- Adaptable with good bolting tolerance
- Dark green colour
- High mass and uniformity
- Full Mildew resistance (BI 16 – 37 EU)
- Suitable for hydroponics

## Type

A little gem lettuce suited for outdoor and hydroponic production for the fresh and processing markets

## Maturity

30 - 40 days from transplant

## Plant Characteristics

Uniform size and shape with dark green thick leaves and a good base.

## Variety Characteristics

Compact head formation with excellent internal quality and leaf colour, heads are uniform with very good weight.

## Features & Benefits

HR: Bremia (BI): 16 – 37 EU

IR: Lettuce Mosaic Virus (LMV) : 1

**Disclaimer:** This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

**Resistance:** is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
