

TROPICAL PUMPKIN VICTORY

A GREY SEMI-BUSH HYBRID PUMPKIN

- A large, grey semi-bush pumpkin
- Fruit up to 12Kg in weight
- Small seed cavity and thick flesh
- Deep flat shape with smooth skin
- Well suited to the processing market

Type:

Large, grey, semi-bush pumpkin.

Maturity:

Approximately 100 days in Summer.

Plant Characteristics:

Semi-bush growth habit with good vigour.

Fruit Characteristics:

Seed cavity is small and the fruit have thick flesh. Flesh is of good quality and colour. Fruit need to be allowed to mature fully for the best results. The smooth skin allows easy peeling and high recovery rates making Victory a good choice for processing. Fruit size of over 10kg is common.

Yield Potential:

Above average yield.

Disease Resistance:

Good general disease resistance.

Features & Benefits:

Large fruit with high yields. Capable of giving good yields in winter plantings due to large size. Good uniformity of both size and shape. Smooth skin and thick flesh with a small seed cavity.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
