

RED OAKLEAF LETTUCE ESTAGIO

TRIPLE RED OAKLEAF LETTUCE FOR YEAR ROUND PRODUCTION

- Dark red colour
- Uniform medium sized leaf formation
- No red spots
- Good red and green contrast
- Slow bolting
- Suited for hydroponics

Type	Triple red medium sized oakleaf lettuce for the fresh and processing market
Maturity	30 - 40 days from transplant
Plant Characteristics	Dark triple red colour with no red spots on the heart, Excellent disease resistance to mildew (BI: 16 – 35,37) Lettuce die back (TBSV), lettuce leaf aphid (Nr: 0) and Lettuce Mosaic Virus (LMV: 1)
Variety Characteristics	Uniform medium sized dark red oak leaf. Strong contrast between red and green colour. Small cut surface
Features & Benefits	HR: Bremia (BI): 16 – 35,37 EU; Nasonovia Ribisnigri (Nr): 0; TBSV IR: Lettuce Mosaic Virus (LMV): 1

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
